Csány László Szakgimnázium Oct 2016 - Jun 2020

Software engineer

Eötvös Loránd Tudományegyetem Faculty of IT

Sep 2020 - Present

Projects

HomeAlone

Mobil dev team member Sep 2018 - Jun 2019

I participated in a school project and we made a smart home project in 3 team:

1, who programmed Arduinos and made the template board

2, who made the database and the API

3, who made the android program

We developed the program every Monday in cooperation with the other two teams. And after the school year presented this project in front of the High School leaders and in front of other local schools on top of that at the ZalaZone exhibition.

szinhaz

Alone Nov 2019 - Apr 2020

This was my final project at High School at C# lesson. It's a theater booking app with login and register function. It is communicating with a MYSQL database.

Github repository:

<https://github.com/bonczbe/szinhaz>

Covid trackandpredict

Team member Sep 2021 - Dec 2021

This was a small project organised by my university to improve our abilities in work as a team.

Programming language: JAVA

The final product with the resource code can be viewed here:

https://github.com/bencusb/covid_trackandpredict

Memory Game

Alone Sep 2021 - Dec 2021

I have made a React Native memory game for my mobil development lessons at my university.

Github repository: <https://github.com/bonczbe/Mobil>

e_commerce_demo

Team member Feb 2022 - Jun 2022

This was a small project organised by my university to improve our abilities in work as a team and get more knowledge in web developing (mostly MYSQL database and Laravel)

The final result was a webshop where users can buy things from sellers.

Github repository:

private

HSUP project

Programmer team leader Feb 2022 - Jun 2022

I made a web application where users can search between products via select any prokect with a team in a HSUP program.

The web project made with MYSQL database, Laravel Backend and React JS forntend with Redux.

Github repository:

private

SocialMedia

Alone May 2022 - Present

I am making a social media platform like Facebook, Discord and Instagram combination.

I am developing this project with MYSQL database (it will change to Redis or MongoDB after my diplom), Laravel backend, React JS frontend. I will use Redux and motion framework for more interaction.

Github repository:

private because of this is my diplom work
